

LORING

The Smarter Way to Roast

Roast Architect™ Profile Design Software

Take control of your roasting process with Loring Roast Architect, a powerful application built exclusively for Loring roasters. Design your roasts with confidence, reduce waste, and achieve consistent results every time. No more guesswork, just precision, efficiency, and control.

ARCHITECT YOUR PERFECT ROAST.

EFFORTLESS CONVERSION

Convert roast profiles from previous versions and formats.

Roast Architect makes it painless to migrate to the new editor.

Upgrade to the latest and greatest, and bring your best-selling roast Profiles with you.

CREATE AND CUSTOMIZE

Build and modify Profiles, Burner Recipes, and baseline curves anytime, anywhere.

PRECISE CONTROL

Edit Profiles through a combination of enterable attributes and a point-and-click curve editor. Specify End of Roast (EoR), charge temperature, and more- down to the second.

PROFILE MANAGEMENT

Edit and manage files on your roaster from your computer via LAN connectivity, or save works in progress on your PC.

When you're ready, upload your profile from Roast Architect directly to a roaster.

Your masterpiece is ready to roast.

You can also create a computer archive of all the Profiles on your roaster, so that you always have a backup.

“ Roast Architect is what roasters who utilize the Loring's automation need to effectively design and manage their profiles. ”

ROB HOOS

SYSTEM REQUIREMENTS

- Microsoft Windows 11 (recommended) or 10
- 4 GB or more of RAM
- 600 MB or more of available hard-disk space
- Connection to Local Area Network (LAN)
- Loring S-model roaster(s) with LCS v2

SUPERIOR IS OUR STANDARD.

Engineered for a roasting experience like no other, every Loring machine gives you unmatched quality, unheard-of efficiency, and unparalleled control.

UNMATCHED QUALITY.

- Designed and made in U.S.A.
- Constructed by skilled craftsmen.
- Stainless steel construction.
- ISO 9001:2015 certified.

UNPARALLELED CONTROL.

- Touch screen and PID provide operation of burner and fan speeds.
- Profiles can be saved and repeated consistently.
- Fully automated roasting process.

UNHEARD-OF EFFICIENCY.

- Single burner roasts beans and incinerates smoke.
- High-speed cooling tray reduces cooling time while protecting beans.
- Up to 80% fuel-savings and reduction of greenhouse gases in every roast, compared to conventional roasters.
